

Continuous realistic-stress reconstruction examples

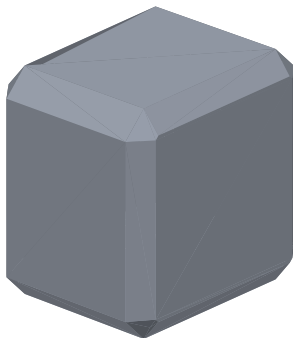

Bowl (concave) — GT

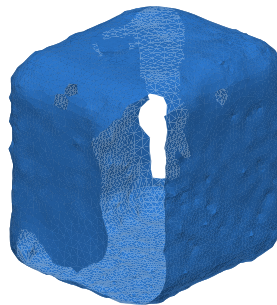

Ray-GPIS reconstruction
F@5=0.960, pose 05

Thin-Irregular — GT

Ray-GPIS reconstruction
F@5=0.975, pose 01

Shown: lowest-Chamfer episode per object; aggregate 15-pose results are reported in the text.
15 FPS/6 s with hand occlusion and contact mismatch. Mesh: support-trimmed Poisson + Taubin smoothing.
